Kevin López González

Morelia, Michoacán, Mexico | 4436397414 | nightmare28899@gmail.com | https://www.linkedin.com/in/kevin-lopez-gonzalez-dev/

Front-End focused Full-Stack Developer with experience building scalable web and mobile applications using JavaScript, TypeScript, React, Next.js, and Laravel. Strong background in designing maintainable architectures, optimizing performance, and working on production systems for enterprise and government platforms.

SKILLS

Programming Languages: JavaScript, TypeScript, PHP
Frontend Technologies: React, Next.js, Vue.js, Angular
Mobile Developer | Cross-platform (React Native, Ionic)
Backend Technologies: Laravel, Node.js, Express
Databases: MySQL
Tools & Infrastructure: Docker, AWS
Engineering Practices: Clean Code, Component Architecture, REST APIs, Design Patterns, Code Reviews

Professional Experience & Leadership

Full-Stack Developer | Next.js | Vue.js | React | Laravel | Php | MySQL | Design patterns, Secretaria de Administración y Finanzas, Morelia

Mar 2024 — Dec 2025

- Led Front-End and Full-Stack development for government platforms, supporting scalable systems used by internal teams and end users.
- Designed and implemented scalable features across web and mobile applications, improving long-term maintainability, stability, and overall system quality.
- Improved long-term maintainability by applying best practices, code optimization, and strategic task planning.
- Enhanced team productivity by identifying and eliminating blockers in the development process.
- Experience coordinating Front-End efforts, contributing to technical decisions, and supporting team productivity through code reviews and process improvements.

Mobile Developer | ionic | Angular | React-native | Design patterns, Telecomunicaciones newww, Morelia

Jul 2023 — Feb 2024

- Developed cross-platform mobile applications with React Native and Angular, focusing on clean code and reusable components.
- Built custom solutions integrating AWS services and internal APIs to improve performance and reliability.
- Designed UI/UX adjustments and architecture components to deliver scalable, high-quality features.
- Improved development workflow through consistent use of design patterns and better build pipelines.

Full-Stack Developer | Laravel | Livewire | Php | Docker | MySQL, La Voz de Michoacán, Morelia

May 2022 — Apr 2023

- Led full development of a newspaper sales system from scratch, increasing sales significantly by implementing Laravel 9, Livewire, and Jetstream for a seamless reactive experience.
- Designed a robust database to support secure information storage, optimizing queries and improving data access speed.
- Built complex business logic, ensured app responsiveness, and managed app updates for Play Store deployments.
- Modernized legacy systems, reducing load times and improving maintainability.

EDUCATION

Universidad Tecnológica de Morelia (UTM)

Bachelor's degree in Information Technology Engineering, Jan 2018 — May 2022

Grupo educativo INCA, Morelia

Technical career in English and Computing, Jan 2015 — Aug 2017
